

slider-comp

slider-comp is an on-going project working with transitions in the Vue.js framework. The component itself is a simple image slider.

slider-comp can be installed via with the included `package.json` file for a local installation via the [npm install](#) command. **slider-comp** depends on the [vue.js](#) framework. A demo folder is provided that used [Parcel](#) together with its associated `package.json` file to bundle together **slider-comp** along with its [vue.js](#) dependency for a simple application.

As a suggestion, install [http-server](#) locally/globally via [npm](#) then enter the command `http-server` in the **slider-comp** `dist` directory. From a browser enter the url: `localhost:8080/` to view the demo.
